Dear Sir:

Like many other Americans, we care about what we put in our bodies. We **do** not want to eat genetically engineered (GE) food. Therefore we strongly urge you to label all GE foods and food ingredients so we can choose not to eat them.

We do not feel that GE foods are safe and 'believe they should' be subject to mandatory pre-market safety testing rather than using the unscientific assumption model. We urge you to declare a moratorium on GE foods until long-term studies show that they are safe for human health and the environment.

Thank you for your time and consideration.

Sincerely,

Beverly Red
